EDUCATION

Barkatullah University 08/2023 – 06/2027

Bachelor of Engineering in Computer Science

- Core Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks.
- Completed Harvard CS50x: Rigorous foundations in C, Python, SQL, memory allocation, and algorithmic complexity.

EXPERIENCE

Software Developer Intern 06/2025 – 12/2025

OZ Media *Remote*

- Engineered full-stack responsive web applications utilizing React and Redux on the frontend with Python Flask backends.
- Configured and maintained Linux VPS production instances, automated deployment scripts, and tuned Nginx web server daemons.
- Implemented relational schemas and optimized queries with SQLAlchemy and MySQL, reducing API response times by 35%.

Web Developer Intern 01/2026 – 06/2026

Digigocare *Bhopal, India*

- Developed interactive clinic analytics dashboards featuring asynchronous state updates and role-based access control.
- Integrated resilient RESTful API endpoints for multi-tenant patient record handling with strict input validation.

OPEN-SOURCE CONTRIBUTIONS

GitLab (Core Upstream Contributor) *Vue.js Frontend Architecture*

- Standardized UI/UX components across core GitLab by implementing centralized Vue.js design tokens, benefiting millions of developers.
- Navigated enterprise-grade code review cycles, automated Jest unit tests, and adhered to stringent upstream coding standards.

Yatoro (Apple Music TUI Player) *Swift Systems & Concurrency Patching*

- Diagnosed and resolved concurrency race condition in non-thread-safe logging during terminal window resize events by patching swift-log.
- Refactored terminal plane coordinate calculations and layout rendering routines, eliminating visual artifacts.

PROJECTS

Pokédex Web Application | *$ Vanilla JavaScript, Service Workers, REST API, Surge* 04/2024 – 05/2024

- Architected offline-first PWA caching PokéAPI payloads with custom LRU cache and TTL eviction, achieving sub-10ms query speeds.
- Implemented custom client-side Levenshtein distance algorithm for error-tolerant fuzzy search over 1,000+ monsters.

Sector 7 Marketplace | *$ React, Redux Toolkit, Node.js, Vite* 10/2024 – 11/2024

- Built high-performance single-page catalog interface with centralized state slices, persistent shopping cart, and route guards.

SmartSpend Expense Tracker | *$ TypeScript, Python, SQLite, OCR* 01/2025 – 03/2025

- Constructed receipt OCR parser with automated expense categorizer and local SQLite synchronization for offline usability.

TECHNICAL SKILLS

Languages: Python, C, Swift, JavaScript, TypeScript, HTML/CSS, SQL

Frameworks & Libraries: React, Vue.js, Redux / Redux Toolkit, Flask, Django, Vite

Systems & DevOps: Linux, Git, GitLab CI/CD, Nginx, Docker, Android Architecture, Cloudflare Pages

Databases & Protocols: MySQL, SQLite, PostgreSQL, REST APIs, JSON-RPC, WebSocket
